IMAGINE YOUR FLOOR  
AS A WORK OF ART

nora®

Discover the freedom to express  
your building's character

## Discover noraplan® lona

When it comes to finding inspiration, look no further than where you stand. Every floor is a canvas waiting to be brought to life. noraplan® lona brings the energy of an artist's studio to every room, creating a space that invites

innovation and visionary thinking. Let this new design set the mood for a truly creative indoor environment that excites and engages the senses.

# Inspiring healing spaces

Hospitals and other medical facilities shouldn't have to sacrifice aesthetic form for clinical function. It's time for a new product that meets the highly specialized needs of healthcare spaces with engaging designs.

noraplan® Iona combines all the material advantages of resilient rubber flooring (stain/slip resistance, underfoot comfort, ease of maintenance, sound absorption, etc.) with an actively patterned range of rich and vibrant tones.

The result is a floor that connects patients, doctors and nurses to the inspired possibilities of every healing environment, encouraging recovery, and a higher level of personal care.

# For upcoming artists

From kindergarten classrooms to university lecture halls, educational building design helps to shape and influence the learning process. Whatever your educational setting, the materials you choose for your school have a significant impact on the well-being of young minds.

noraplan® lona was developed with the unique needs of educational facilities in mind. Acoustic properties that help teachers better connect and communicate with students.

Ergonomic comfort for teachers who spend all day on their feet.

noraplan® lona is completely free of PVC, plasticisers (e.g. phthalates) and halogens (e.g. chlorine). So that kids can be kids. Tie it all together with a rich palette of colors that inspire the exchange of ideas, and it's easy to see why noraplan® lona is the smart choice for educational design.

# The palette

Utilizing a newly developed technology that allows for an extensive range of unique designs, noraplan® lona harnesses the essence of creativity. The splashes and droplets come together to form patterns that capture the momentum of artistic expression. The silk-matte, lightly structured surface adds visual depth to the filigree arrangement of contrasting colors and accents.
