SELECT CONCEPTS

MODULAR STAGING SOLUTIONS

Select Concepts, an Australian family owned business, is the distributor for staging systems that have been successfully manufactured and installed for over 35 years through-out Europe. With the technical back-up and support of our UK and German suppliers we are committed to providing the highest quality product and service.

- Adaptable
- Lightweight
- Easy to assemble
- Compact storage
- Minimal noise
- High quality

QUATTRO STAGING SYSTEMS

The staging platforms are based on a system which has been designed and developed, being tried and tested over many years – worldwide.

- Stage platforms are simple to set up and take down in a very short time.
- Excellent and very easy platform linkage with robust aluminium connection profiles providing automatic joint levelling; no manipulation underneath the platforms is required.
- Extremely durable even with frequent use.
- Large, tough plastic feet to protect floors.
- Optimum appearance of all parts, reliability and long service are results of careful workmanship in every detail.
- Very small storage area required.
- Aluminium edge profile gives total protection to the otherwise vulnerable timber edges.
- Strong 22mm thick timber decks are screwed in tightly to prevent noisy loose boards and timber warping.
- Edge profile provides an extremely strong yet simple and accessible fixing point for the joining connectors and accessories such as steps, handrails, fascia panels, back drops etc.
- Platforms are manufactured with bolted aluminium corner castings. This provides the platform with a small amount of flexibility enabling the stage to 'settle' onto uneven floors.
- Should damage occur, the bolted construction allows simple and quick in-house maintenance.
- All platform types can be used in conjunction with each other.
- Full testing and certification to load capacity of 1530kg at all heights.
- Platforms usually manufactured in modular sizes to provide very flexible usage.
- Virtually all shapes, sizes, heights and finishes can be catered for.

A first class product with service to match.
