# Our slimmest concealed cistern

Creating beautiful  
bathrooms since 1964

Know-how  
from  
Switzerland

# Our slimmest concealed cistern

At 75mm it's as wide as this page

**At Geberit we understand how important it is for your bathroom to be an expression of you. It's your private sanctuary, where you go to relax, indulge and soak away the stresses and strains of a hectic modern lifestyle.**

**Geberit's range of concealed cisterns create more space in a bathroom or ensuite, allowing you the freedom to express yourself through a wider choice of bathroom fixtures.**

**With pipes and cistern hidden, your bathroom will appear more spacious with clean, uncluttered lines. Because the Geberit system is such an attractive, sleek and elegant solution you'll be inspired to create the perfect oasis.**

# What goes on behind the scenes makes our cisterns run like clockwork

Swiss technology at home in Australian bathrooms

## A Geberit concealed cistern for every home

With a range of sizes to fit almost every situation, innovative Geberit concealed cisterns are more widely used in bathrooms across Australia. With a choice of 4.5/3 litre or 6/3 litre flush volumes, Geberit has a solution, whatever the size of your household.

## More space in the bathroom

Geberit's concealed cisterns can be installed in-wall, in-vanity, in-duct or elevated to the ceiling, freeing up valuable bathroom space. The system consists of a frame that integrates the cistern in the wall and a plate with buttons for flush actuation.

Know-how from Switzerland

## Swiss technology in the background

Out of sight and out of mind. Geberit incorporates leading Swiss technology to ensure years of trouble free operation.

## Choose any designer toilet pan

Geberit concealed cisterns can be paired with a vast array of toilet pans, wall hung or floor standing; providing greater design scope and flexibility. Choose the pan design you love, simply match the WELS star rating of both cistern and pan to create your own individual designer look.

10 year tank warranty  
25 year parts supply limited warranty

## Technically superior

Since 1964, Geberit concealed cisterns have been European market leaders in quality and reliability. Geberit offers a 10 year limited warranty on cistern tank and Duofix installation frame and 25 year spare parts supply warranty (exclusions apply).\*

## Easy to clean

Concealing the cistern and mounting the pan on the wall is a perfect design solution and makes cleaning easier and the bathroom more hygienic.

## Save water

With two different flush volume options, 4.5/3 litre or 6/3 litre, you can decide how much water you save. You control your water usage when operating the toilet and you protect the environment on a daily basis.

## Reliability

Geberit concealed cisterns are a combination of beauty and brains. There are no seams that can leak. Each tank is a one piece, blow moulded unit which is pressure tested for absolute water tightness before assembly. We guarantee it.

\* For detailed information on our manufacturer's warranty refer to our website, [www.geberit.com.au](http://www.geberit.com.au) or contact Geberit on +61 2 9889 7866

## Strong, stable and easy to service

Each frame is tested to withstand 400 kg of weight. The tank is easy to service through the push/access plate.

Service is easy via push-access plate.

All moving parts can be removed through opening.
