THE GREEN BOOK – Energy Efficient & Acoustic Building Solutions Guide

FLETCHER Insulation has for over 55 years provided energy efficient and acoustic solutions to the residential, commercial and industrial markets. Fletcher Insulation is the only company in Australia to manufacture and distribute all types of insulation for thermal and acoustic systems.

At the forefront of innovation and development of new trends, cost effective and compliant products, Fletcher Insulation remains committed to offering valuable service to the architectural and specifier market.

This commitment has led to the development of a comprehensive systems and insulation manual, 'The Green Book'.

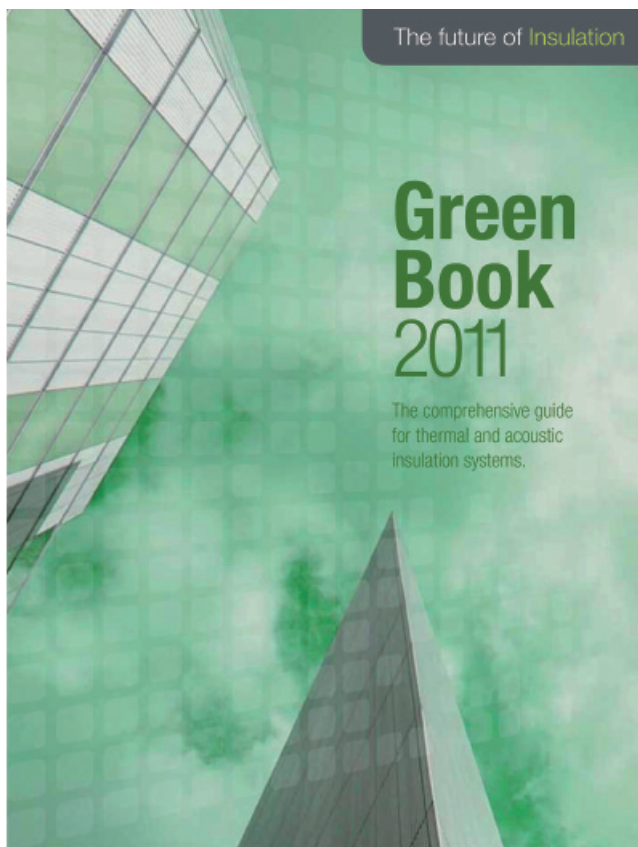

The Green Book was specifically designed to meet specification needs and provide a simple method of identifying energy efficient and cost effective solutions

that meet Building Code requirements and comply to all relevant Australian Standards.

If you are an architect, engineer, designer or specifier looking for the right insulation solution for a specific residential or commercial system, you can register at the Green Book Online site www.insulation.com.au/greenbook for access to CAD drawings, product datasheets, system and product options to suit your needs.

Our Technical Sales Team has the experience and knowledge to provide assistance for any project or development to meet energy efficiency requirements, and coupled with our local research and development facilities, Fletcher Insulation can cater a solution to your specific requirements.

Enquire online if you require a customer solution or would like a registered hard copy of The Green Book.

Fletcher Insulation

We safely deliver extraordinary value to our customers

'It's as easy as look up, choose and download CAD drawings and product data'
