Turn every project into a landmark

# Stramit® Metallic Monopanel® Cladding

## Economical architectural walling solution

Turn functional buildings into premium projects with Stramit Metallic Monopanel® cladding.

Stramit Monopanel® cladding is an attractive, durable system of interlocking panels with concealed fixings. Combined with the unique lustre of COLORBOND Metallic® steel, Monopanel® cladding provides a feature wall that enhances the appearance of any building.

- Impressive appearance.
- Cost effective alternative to composite panels.
- Adds a point of difference to building designs.
- Enhances the corporate image of your client.
- Ideal for soffit or cladding applications.
- Adds a stylish facade to residential projects.
- Available in a range of COLORBOND Metallic® finishes.

### Features

- 250mm cover for quick installation.
- Easy Installation – "fix, hinge and cover, fix again".
- Versatility – can be used in either vertical, diagonal or horizontal applications.
- Secret fixing – fasteners are concealed from view.
- Trims – complete range of trims and accessories available.
- Continuous interlock – to weather-seal all joints.
- High tensile steel – for greater damage resistance and performance.

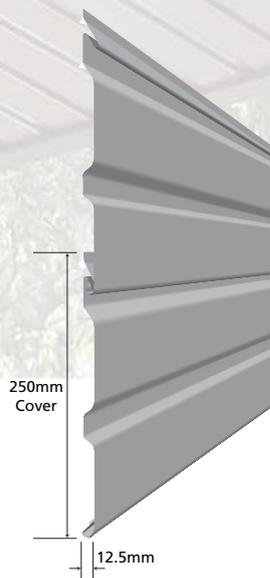

Also available in COLORBOND Ultra® long-life coated steel or COLORBOND® coated stainless steel for very corrosive environments. Stramit® guttering, fascia and rainwater goods can be ordered in premium finishes, too.
