

NOW WITH NEW
WASTE TRAP!

Sustainability - Every Day

uridan 
waterless solutions

Improving our
surroundings
aesthetically and
environmentally.

Flushing a urinal with potable water is a waste of this valuable resource. Water is simply too precious to be wasted. This innovative idea sits at the heart of uridan and inspires us to create products with superior functionality while offering distinctive Danish designs.

Improve sustainability and save costs

A conventional urinal can use up to 150,000 liters of valuable drinking water per year. uridan aim to conserve this precious resource for the more important things in life.

uridan will reduce your environmental footprint and reduce costs. Saving water can lead to significant improvements in building efficiency and cost savings. Saving an estimated 150,000 liters per urinal per year - uridan provides a simple sustainable solution.

uridan is synonymous with saving water. Sustainability, simplicity, and elegant Danish design.

NOW WITH
FAST & EASY
MAINTENANCE!

Innovative and Unique - the new uridan Technology.

uridan's unique
waste trap

uriLOCK -
pharmaceutical grade,
biodegradable blocking fluid

uridan waterless urinals are more hygienic than conventional flushing urinals. While the moist environment of conventional urinals encourages the development of bacteria and fungi, the uridan solution provides a dry environment that prevents the buildup of unpleasant bacteria and odors.

How it works?

Ongoing research and development has led to today's superior uridan design. The heart of the uridan urinal is the unique waste trap that works with uriLOCK, uridan's biodegradable odor blocking fluid. UriLOCK is lighter than urine, remaining on the surface of the waste trap to create a liquid seal. While urine flows directly into the sewer system below, uriLOCK's liquid seal prevents sewer odors from entering into the room above.

What's new?

- Fast, odorless, and non-contact maintenance thanks to new technology
- No unnecessary opening of the waste trap
- Maintenance in just 10 seconds
- Absolutely water-free maintenance

Aesthetics: A Labor of Love.

Functional and Sustainable with Unique Danish Design.

Whether you are designing a [residential bathroom](#) or a [large commercial project](#), uridan has the solution. uridan offers a range of standardized products with tailor-made solutions available to meet your unique requirements. Our products can be manufactured in any color to match your requirements.

It's [your choice...](#)

Admiral

Designer Troels Bøgely

Colours:

-  White
 -  Stone Grey
 -  Granite
 -  Stone Nero
 -  Jet Black
- plus special colours

Material: Ceramic or Glass reinforced plastic (GRP)
Servicing (refilling uriLOCK): around every 3 months
Installation: horizontal or vertical

The Admiral has distinctive elegance. The designer wanted to create an attractive and user-friendly waterless urinal. The simple shape and smooth curved surfaces ensure that the urinal remains simple to clean and maintain. The Admiral is frequently specified for office buildings, restaurants, hotels, clubs, schools, and sports stadiums. The Spinnaker Privacy Screen has been designed to complement the design lines of the Admiral providing comfort and privacy for users.

Cadet

Designer Troels Bøgely

Colours:

-  White
 -  Stone Grey
 -  Granite
 -  Stone Nero
 -  Jet Black
- plus special colours

Material: Ceramic or Glass reinforced plastic (GRP)
Servicing (refilling uriLOCK): around every 3 months
Installation: horizontal or vertical

This timeless design makes the Cadet a classic. The designer wanted to create a smaller, compact urinal with a simple design, curved surfaces, and user-friendly form. The ceramic model is a favorite for commercial office buildings, schools, and airports; while the fiberglass model is ideal for public spaces. The Cadet can be positioned lower on the wall for use as a children's urinal.

Captain

Designer Yu Bobek

Colours:

White
 Stone Grey
plus special colours

Material: Glass reinforced plastic (GRP)

Servicing (refilling uriLOCK): around every 3 months

Installation: vertical

This versatile urinal can be used by men, women, and children alike. Female and unisex waterless solutions are perfectly suited for event hire toilet facilities where there is a desire to reduce toilet queuing and water usage. The uridan Captain is a hygienic alternative as there is no contact with the unit and no flush required to operate. Privacy can be maintained by installing the units in cubicles.

Compass

Designer uridan a/s

Colours:

White
 Stone Grey
plus special colours

Material: Glass reinforced plastic (GRP)

Servicing (refilling uriLOCK): around every 3 months

Installation: vertical

The Compass has gained popularity in low-energy homes in Europe. This versatile urinal can be used by men, women, and children alike. Distinguished by a simple, hygienic, unisex design, the Compass is ideal for locations with a limited water supply.

Pylon

Designer Troels Bøgely

Colours:

- White
 - Stone Grey
 - Granite
 - Stone Nero
 - Jet Black
- plus special colours

Material: Glass reinforced plastic (GRP)

Servicing (refilling uriLOCK): around every 3 months

Installation: vertical

The Pylon is uridan's most 'funky' design created specifically for clubs, pubs, restaurants, and hotels looking for a modern design theme. The simple, sophisticated design is available in three heights: Pylon Mini, Midi and Maxi. The Pylon is extremely versatile as this unit can be installed over existing toilet plumbing, saving property-owners on the cost of installation.

Crew

Designer uridan a/s

Colours:

- Granite
 - Stone Nero
- plus special colours

Material: Glass reinforced plastic (GRP)

Servicing (refilling uriLOCK): around every 3 months

Installation: horizontal or vertical

The uridan Crew waterless trough urinal is ideally suited for venues catering to a large number of males. Widely used in sporting venues, entertainment centers, de-mountable buildings, and schools, the Crew is available in three lengths: 1200mm, 1800mm, and 2400mm. Apart from the obvious water savings, the resilient fiber-glass material provides a high level of protection against vandalism.

Wide range of solutions.
Carefully researched.
Carefully tested.

uridan provides *diversity at its finest*. uridan delivers the *highest level* of sustainability, functionality, and outstanding Danish design.

Frequently specified for large commercial office towers, sporting stadiums, shopping centres, schools, universities, restaurants, hotels, bars, and clubs, uridan urinals combine environmental performance, operating costs benefits, and great design.

Our goal of saving our earth's precious water resources is now an *international endeavor*, with Uridan products now available *across the globe*.

Those who love life must *conserve water!*

NOW IN ONLY
10 SECONDS!

We offer simplicity. With less costs and less effort.

The cost-efficiency of the Uridan urinal becomes apparent with its simple installation. Uridan urinals do not require water, complex plumbing, electrical flush mechanisms, sensors, or any associated fittings. Just pour the uriLOCK blocking fluid over the cover and the urinal is immediately ready for operation again.

Refilling
uri**LOCK**^{NEW}

Our patented, biodegradable blocking fluid ensures that your uridan urinal remains completely odorless, operating without the need for costly sealants or chemical additives.

- » Pour uriLOCK blocking fluid directly over the cover.
- » Refill around every 3 months.

Functional, Remarkable, and Easy - The uridan Hygiene System.

Daily
Cleaning
uri**CLEAN**^{NEW}

uridan can be cleaned very simply with the aid of uri**CLEAN**. Simply spray the urinal surface with uri**CLEAN** and the lotus effect prevents any adhesion of urine drops, causing them to simply roll off.

- » Spray uri**CLEAN** on the cover and surface.
- » Leave for a moment to react

- » Clean by brushing in a circular motion with a conventional brush.

- » Polish the outer and inner surface in circular motion with the uri**CLOTH** cleaning cloth.

Say Goodbye to heavy and persistent dirt and deposits!

Deep
Cleaner
uri**STRONG**^{NEW}

uriSTRONG is the cleaner for very heavy and persistent dirt and deposits in sanitary areas. uriSTRONG also removes lime and calcification. The recommended application is 1 to 2 times a year.

- » Pour 5 to 10 liters of water directly over the cover
- » Lift cover with suction device.

1:20
to 1:10

- » Mix uriSTRONG with warm water as indicated in the instructions.

5 to
30 min.

- » Pour the diluted uriSTRONG solution into the urinal, allowing 5 to 30 minutes of exposure time.

10l H₂O

- » Rinse using 10 liters of cold water.
- » Insert the cover and pour uriLOCK over the cover.
