 **ENWARE**
AUSTRALIA PTY LIMITED

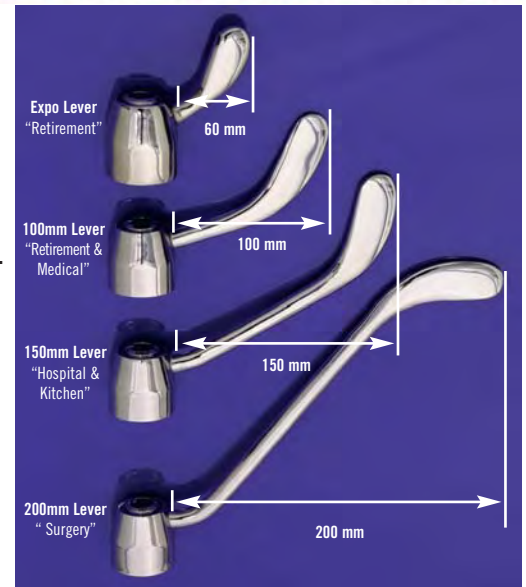

HYGIENIC LEVER ACTION TAPWARE FOR SUPERIOR OPERATION

Enware's Lever Action Tapware is a world leader for quality, simplicity and proven endurance. The functional designs – in sizes of 60mm, 100mm, 150mm and 200mm – make them perfect for applications in which ease of operation and control is paramount.

The versatility of wall or bench mounting makes them ideal for medical, surgical and laboratory use, as well as hygienic commercial food preparation. The simple lever action brings extra convenience for convalescent and retirement facilities; and especially for those with arthritis.

Each Lever Action tap is WaterMark licensed to AS/NZS 3718; created from durable, dezincification resistant brass for a long life. The easy action quarter-turn valve technology is available in standard ceramic disc, non-rising jumper valve; or in heavy pattern, rising jumper valve.

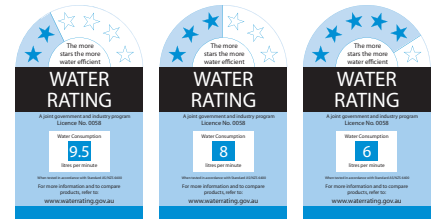

WELS Star rated to maximise water efficiency

Water wastage can account for a large percentage of consumption.

Enware's Anti-Vandal tapware helps by minimising the water wasted whilst still delivering a practical and comfortable service to the user.

- Predetermined flow rate minimises excessive water usage during normal use
- Enware's Lever Action tapware is WELS registered to deliver Basix, PIC and other regulatory authority compliances
- Showers are available in WELS 3 star 7.6 lpm only
- Hose taps, cistern taps, stop cocks and bath taps are exempt from WELS ratings
- Single Lever Mixers are supplied standard with a 4 star (7.0 lpm)

Enware's Lever Action tapware is supplied standard with a WELS 3 Star (7.7 lpm) water efficiency rating.

Also available in 2 (9.1 lpm) 3 (7.7 lpm) and 5 (5.6 lpm) Star ratings.

Options and Technical Information

Finishes:

The standard finish is a heavy duty bright Chrome Plate. Optional is a Satin Chrome finish or a range of colour powder coated finishes.

- **Satin Chrome:** Specify with order & use SC at the end of the code. Eg HOS401SC
- **Powder Coated:** Specify with order
- **For Colour Coated Handles only:** Specify with order
Note there are additional charges for non standard finishes.

Colour Indicators:

New standards for the delivery of warm water to ablutionary outlets in Australia means a Yellow indicator may be required. Check with local authorities for application requirements.

- **Red & Blue Buttons:** Standard with all tapware sets.
- **Yellow & Blue Buttons:** Request when specifying or placing orders.
- **Colour Coded Handles:** Specify colours required when specifying or placing orders.

For warm water delivery to ablutionary outlets under AS3500.4, choose from the Aquablend range of Thermostatic Mixing Valves.

Spouts and Outlet Attachments:

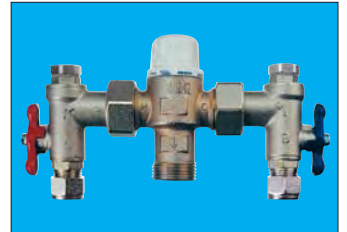

Enware offer a wide variety of Spouts and Shower Roses, please refer to our Outlets brochure, interactive CD-ROM, website or contact an Enware representative. Enware can also cater for special requests with our custom fabrication facilities.

Standard Valving Quarter Turn Ceramic Disc	Optional Valving Quarter Turn Jumper Valve Non-Rising	Optional Valving Quarter Turn Jumper Valve Rising	
Recommended Working Pressures/Temperature			
Ceramic Disc:	Minimum 50kPa	Maximum 800kPa	Maximum Temperature 75° C
Jumper Valve:	10kPa	1500kPa	95° C
For optimum performance hot and cold pressures should be equal.

Specialist Tapware and Safety Products

Aquablend TMVs: The safe way to mix water to a pre-set temperature.

Aquablend Thermostatic Mixing Valves are Australian made, simple and easy to maintain, Standards marked to AS/NZS4032 - and provide many features that not only match but exceed industry standards. A summary of their proven benefits includes:

Scald protection

The thermal shut-off capability delivers immediate shutdown of the valve in the event of hot or cold water supply failure. The valve will reinstate itself when normal supply resumes.

Constant mix control

Water temperature is maintained at plus or minus 2 degrees, even during water temperature or pressure fluctuations.

Easy maintenance

The compact cartridge-style assembly allows low-cost, in-situ servicing and ensures minimum down-time.

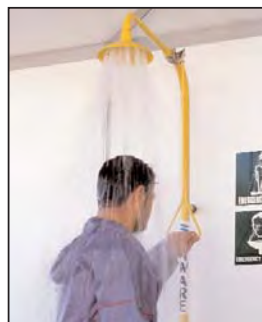

Supplied complete

Each unit comes complete with combination isolating ball valve, non-return and dual-stage strainer assemblies which incorporate water pressure/temperature test ports.

Commercial Laboratory Tapware

Enware manufacture an extensive range of high quality, Australian made laboratory tapware including RO water, gas and dry media fittings.

Safety Solutions

Enware manufacture a wide variety of Deluge Showers and Emergency Eyewash Equipment. Also available is the Fendall range of portable eyewash equipment.

Food Service Tapware

Enware manufacture an extensive range of pre-rinse assemblies for commercial kitchens. The range is interchangeable with pot fillers.

Hands Free Tapware

Enware offers a comprehensive selection of sensor operated tapware as well manual systems such as Knee and Foot operated.

LEADING ORGANISATIONS CHOOSE ENWARE

Enware's award winning tapware is appreciated for its style, function, uncompromised quality and price. That's why it's chosen by these leading Australian and international companies:
