

BLOCKOUT[®] SHUTTERS

COMMERCIAL
RETAIL
APPLICATIONS

BLOCKOUT® SHUTTERS

FEATURES

Blockout Roller Shutters can provide the best solutions for commercial retail installations.

Blockout Shutters design, manufacture and install shutters for individual display counters and custom made commercial fitouts.

FITTING

Blockout's shutter curtain (profile) choices include the 41mm Roll Formed Aluminium shutter, 45mm Maxiview® Single walled extruded shutter (either perforated or non-perforated) and additionally the 40mm double walled extruded profile.

The shutter tracks are custom made for each type of shutter chosen to ensure accurate fitting and operation.

SECURITY

Security and protection are generally the most important factors in these applications. Blockout Shutters include a heavy duty bottom bar with security key locks for additional strength and durability.

The ultimate security solution is Blockout's Maxiblock® Shutter in which the tracking system's design is 3 times stronger than a conventional shutter.

FINISH

All extruded profiles can be powder coated or anodised to coordinate with the overall design and colour branding of the display.
