EnviroSlat®

Long life, low maintenance, pre-coloured, sustainable, decorative fencing/screening/cladding material.

futurewood.com.au  

reaching for a sustainable world

Give yourself the peace of mind that comes with knowing your classy looking screen fence will require very little maintenance* for years and years.

Compare the value of these EnviroSlat features:

- » Great value for money compared to painted/stained timber
- » 5 designer colours: Chocolate, Mahogany, Saltbush, Slate Grey and Walnut
- » Colour softens after the first few months of weathering and then retains its general look year after year
- » Colour runs completely through the material, never needs painting
- » Made from recycled cellulose (rice husks and hardwood flour) and HDPE waste
- » Can be painted if a specific colour match is required
- » Very low maintenance, fully finished and ready to install
- » Black powder coated aluminium fence posts and "U" channel available to create a D.I.Y. fence kit
- » Low water absorption
- » Rot proof
- » Termite resistant
- » Will not cup or crack
- » UV stable, tested to suit Australian conditions
- » 10 year warranty
- » Standard 70mm x 15mm x 5400mm and 30mm x 40mm x 5400mm lengths
- » Custom sizes and architectural profiles available to order**
- » Matching CleverDeck® decking boards also available

* Futurewood recommend that your EnviroSlat is cleaned with soapy water approximately once per year to remove any grime that may build up.

** Minimum order quantities apply.

EnviroSlat offers the illusion of a well finished timber board but is a wood plastic composite made from recycled materials and not produced from our global rainforests like many timber fencing materials.

EnviroSlat eclipses traditional timber pickets and boards. The low maintenance finish of EnviroSlat provides an environmentally friendly alternative to rotting timbers and the arduous task of sanding, filling and painting/staining that traditional timber fences demand.

EnviroSlat lets you enjoy the beauty, peace and solitude of your private space without the worry of time consuming and expensive maintenance.

EnviroSlat is great for pool fencing, front fencing, masonry fence infills, screen fencing, gates, balconies, body corporate spaces, patios, gables, sun screens, outdoor furniture, shop-fitting etc.

EnviroSlat – the smart alternative to finished, decorative timber boards for use inside or outside the home.

Note:

- » EnviroSlat has specific installation requirements.
- » Please refer to our website for a copy of our fixing guidelines.

EnviroSlat Decorative Cladding

EnviroSlat Cladding can help you achieve a stunning design/finish to your project that will require very little maintenance compared to traditional timber and is made from recycled, environmentally friendly material which won't rot.

EnviroSlat Decorative Cladding Boards come in a range of shapes, sizes and finishes for interior and exterior applications.

Available Sizes

- » 30mm x 40mm decorative cladding
- » 70mm x 15mm decorative cladding/screening
- » 32mm x 42mm concealed fix decorative cladding*
- » 60mm x 40mm decorative cladding*
- » 90mm x 25mm decorative cladding*
- » 90mm x 40mm decorative cladding*

* Custom made cladding is available in multiple colours and finishes and subject to a minimum order quantity and lead time.

Advantages over timber

Futurewood does not require painting, does not rot, splinter or lose its colour.

Futurewood looks like timber but is made from recycled HDPE (post industrial waste), rice husks and recycled hardwood timber so it is more ecologically sustainable than timber.

Environmentally friendly

Our range of products for fencing, decking and cladding applications are made from recycled and reclaimed materials.

Plus Futurewood timber alternative products do not require oiling, staining or painting so you can avoid the use of these chemical based products.

Cost effective

Futurewood products provide a cost effective alternative to traditional hardwood timber decking, fencing and cladding materials.

They are quick and easy to install, come in standard lengths and do not require regular maintenance.

Futurewood, the low maintenance timber alternative.
