Now there is a solution to every drainage problem

beautifully designed
drainage solutions
for indoor and outdoor

Creative Drain Solutions

Advantage

Creative Drain Solutions...
beautifully designed and engineered lineal
drainage solutions for indoor and outdoor.

Quality architectural lineal drainage systems made from high grade 316
stainless steel.

Super strong, rigid grates and trays to take the tough stuff, yet visually
pleasing to complement today's modern finishes.

We have set out to lead the field and create a product you will be proud
to showcase.

You can be confident in life-long quality and satisfaction.

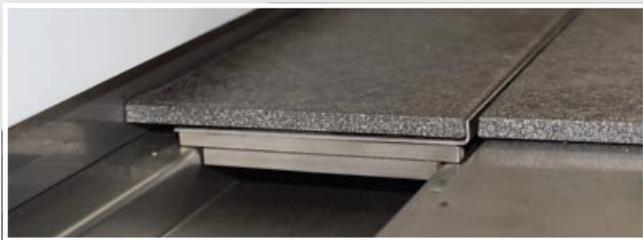

a new approach to lineal drains

Advantage Wall to Tile

Advantage Budget Tile to Tile

Advantage Tile Insert Grate

Advantage

The ADVANTAGE lineal drain is a beautiful and stylish stainless steel lineal drain that will complement the decor of any bathroom. The ADVANTAGE style is where only the grate is visible next to the tile or wall.

Creative Drain Solutions are proud to introduce a fresh approach to the challenging issue of drainage, with a range of beautifully designed and engineered solutions that are not only strong and functional but stylish and sure to complement any decor.

Waterproofing flanges

One of the major benefits of using a CDS bathroom drain is the built-in waterproofing flanges. Both the Advantage and Ultimate style bathroom drains are manufactured with large waterproofing flanges for ease of waterproofing applications.

Waterproofing tradesmen can now waterproof lineal drains with confidence.

Built-in fall

The Bathroom and Outdoor CDS drains also come complete with built-in fall. The drains only take up the depth of the flooring and the tile underlay, therefore it is not necessary to cut joists.

All drains are left, right or centre.

Plumbing

Our bathroom drains are fitted with a plug and washer waste with a 50mm thread, which will fit straight to a 50mm trap, or can be adapted to fit a puddle flange.

Now the CDS lineal drain can be installed in no time at all.

Stainless Steel

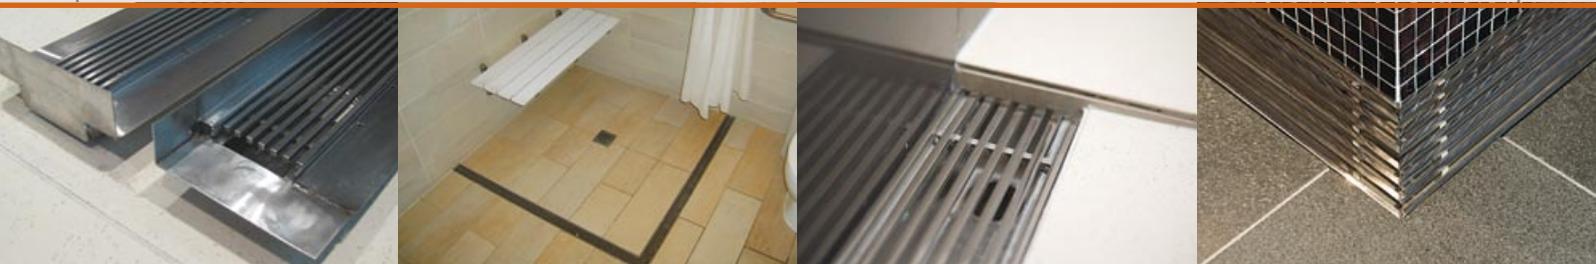

Creative Drain Solutions build quality drainage systems manufactured from high grade Stainless Steel. The channel, grate and waterproofing flanges are all made from 316 Stainless Steel.

Our Bathroom drains are available in three different finishes – matt, brushed and polished.

Our Outdoor drains are available in a matt finish.

Plug and washer supplied exceeds clause 8.3 of ATS 5200.040:205.

Creative Drain Solutions

Ultimate

sophisticated and elegant stainless steel

creative architectural drainage solutions for your dream bathroom

Ultimate Step Up

Ultimate

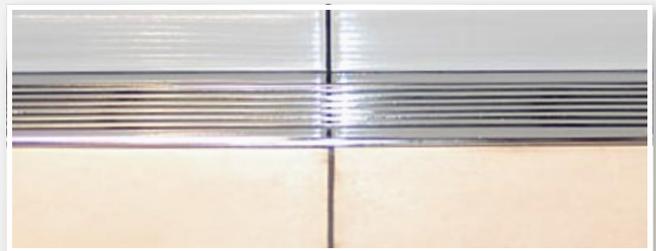

The ULTIMATE is a sophisticated and elegant stainless steel lineal drain that will enhance the appearance of any bathroom.
