

A space this big...

...deserves the best solution.

# OPEN has what it takes to maintain the integrity of your design.

As a designer you need to manage the window space. OPEN Shutters can help with design and project management, from advice over the phone to onsite consultations with our preferred tradesmen. With OPEN you can enjoy a level of quality that only comes by not making compromises.

Australia's most experienced shutter maker has more ways to help you stay in control.

- OPEN Shutters has a technologically advanced manufacturing facility totally under our control here in Australia, ensuring custom fit and finishes.
- OPEN employ experts in each of the areas that make a difference: cabinet makers, carpenters, engineers, shop fitters, wood machinists & spray painters, all to ensure we have the expertise to custom build to suit your requirements.
- OPEN source the materials best suited for the application of your design in situ.
- OPEN have invested in advanced project management systems, which include a full measure and installation service. Accuracy of the measure and quality of the fitting are critical to the success of every installation.
- OPEN work with you to make sure your customers get the best solution for energy savings in their buildings.
- OPEN have an ongoing training program at all levels: production, customer service, design and installation.
- OPEN have an advice line for your technical and design questions.

Australia's leading designers trust us to bring their visions to life.
