Water Solutions for a Healthier Environment

Education Solutions
– product selection guide

Well-designed schools can improve learning outcomes, health and wellbeing.

Besides improving comfort for students and staff, they can also help to reduce the impacts of both the urban heat-island effect and greenhouse gas emissions.

Schools should be designed to minimise the consumption of energy, water and natural resources and to reduce waste. They should also be durable and resilient while at the same time optimise health, safety, and security through pleasant and engaging spaces.

Having provided solutions for the education sector for more than 30 years, we understand all the needs and offer an extensive range of specifically designed products.

th
ANNIVERSARY

90 years of Australian manufacturing

Easy to use

For our taps and bubblers, you can choose from self-closing (cam action, lever action or push button handles) or fully automated options (sensor activation including the all-in-one hand wash dryer).

Hardwearing and vandal-resistant

Our products are designed to be vandal-resistant and use robust materials like chrome plated DZR, stainless steel, epoxy or polyester powder coating, and nitrile rubber compounds that are proven to withstand the test of time, and heavy-duty usage in laboratory environments or Australia's harsh outdoors.

Safe

While all our products are safe and compliant with the stringent Australian standards we wanted to provide you with the choice to future-proof your project by offering Lead Safe™ DZR and stainless steel options for your taps and bubbler selection. Additionally, our rubber mouthguard offers protection for children's teeth and their health alike thanks to its unique design and highly fungal and bacteria resistant material.

We are now also offering revolutionary anti-microbial germ-shield® coated handle options for optimal protection.*

*for selected products only - please contact us or go to galvinengineering.com.au for more information

Water-conserving

Using water efficiently has always been at the forefront of our product developments. Depending on your requirements you can choose from self-closing or sensor activated products with timeflow or timed shut-off options. Compliant with AS/NZS 3718 our products are WaterMark and WELS approved (where applicable).

We can cater for all your needs in areas such as amenities, laboratories, kitchens, bathrooms and outdoor areas.

Discover our full room indoor and outdoor product offering on the following pages or contact us for a customised solution for your next education project.

Drinking Tapware & Bubblers

Reliable and hardwearing, our drinking bubblers and bottle fillers are the perfect choice for an internal or external school environment. Offering a selection of handles and activation mechanisms to choose from, our product range not only assists in infection control through handsfree operation, but also ensures efficient water use.

Laboratory Tapware & Gas Outlets

Our AS/NZS 3718 approved laboratory tapware and AS 4617 AGA certified gas outlets are specifically designed to be used in a school laboratory environment. They feature tough vandal resistant handles with a unique locking system for additional safety, and a comprehensive range of interchangeable nozzles for flexible use. Every tap is quality tested and can be ordered in a satin chrome plated finish or chemical resistant epoxy coating to suit your environment.
