CORPORATE OVERVIEW

Trust. Reliability. Integrity.

Our Vision is based on both how far we have come as well as how far we plan to go. We are Passionate People Distributing Leading Brands to the benefit of our customers and our suppliers.

The HVG Facades vision is built on providing our customers with leading brands, quality products and experienced sales, logistical and technical support from passionate people.

Our Mission is to be the distribution partner of choice, providing industry leading sales, marketing and logistics expertise to our suppliers.

A culture of support, empowerment and accountability gives our staff a working environment in which they can thrive.

MARKET LEADER OF TRUSTED CLADDING BRANDS

AUSTRALIAN-OWNED

A subsidiary of Sanwa Holdings, HVG Facades is an Australian-owned market leading supplier of premium external wall cladding systems for the construction industry.

As a strong and successful business with a history dating back more than 50 years, HVG Facades is a dedicated facade products supplier of trusted brands including MondoClad®, ZINTL®, Nucleo® and ALUCOBOND® PLUS.

HVG Facades product warranties give you long-term peace of mind and our quality service is just a phone call away.

We stand behind our products and the quality underpinning them, our service, and our people.

HVG Facades' products are used across a diverse range of exterior cladding for new builds, or remedial and recladding applications. Our highly experienced team are there to support the ideas and aspirations of architects, property developers, designers, and builders at every stage of the process.

HVG's customer-focused experts cover it all.

- A trusted industry leader
- Supplier of superior and trusted cladding brands
- Our wide range of products can be used across multiple applications
- Non-combustible product range to suit any design (excluding ALUCOBOND® PLUS)
- Detailed technical support and one-on-one advice
- Nationwide distribution from mainland state capital branches
- Proven durability in the harsh Australian environment
- Extensive range of samples available
- Large inventory holdings in each branch
- Low maintenance
- Full local architectural, technical, and sales support is available in each state

SAFETY AND COMPLIANCE

OUR NON-COMBUSTIBLE COLLECTION

MondoClad

MondoClad® solid aluminium panels are made of high performing marine-grade aluminium.

- Non-combustible 5052 marine-grade alloy
- Tested to AS1530.1 and AS1530.3 (test certificates available upon request)
- Passes all the compliance requirements of the NCC Weatherproofing Verification Methods AS4284 H2V1 and F3V1
- CodeMark Certified to Building Code of Australia (BCA)

ZINTL

ZINTL

Certified non-combustible to AS1530.1 and AS4284 (Weatherproofing), ZINTL® premium interlocking aluminium cladding system offers a simple solution to façade safety and ensures a simple pathway to achieving National Construction Code (NCC) compliance.

With its wide profile range (including both solid and wood colours) and being certified non-combustible to AS1530.1 under clause C2D10(b)(e) of the NCC, ZINTL® offers design flexibility and the comfort of non-combustibility.

NUCLEO

NUCLEO

Nucleo® is a high-quality engineered aluminium facade product.

- Deemed non-combustible
- Made from high quality marine-grade aluminium 5052
- Tested to AS4284
- Easy to fabricate, light weight, rigid and ultra flat
- PVDF finish, excellent UV stability and colour retention
- Available in custom sizes, colours and finishes
- Competitively priced and stocked locally
- 15-year warranty
- Technical and sales support
- 100% recyclable

Our warehouses around the country continue to grow to accommodate our growing business.

Our frontline team are focused on delivering exceptional service and outcomes for our customers.

You can be assured we will be here to support you for many decades to come.

OUR TRUSTED BRANDS

HVG Facades' products are used across a diverse range of exterior cladding, remedial and recladding applications across the residential, commercial, industrial, education, aged care, sporting, and healthcare sectors.

MondoClad

Whether it's a new commercial project or the recladding of an existing combustible construction, MondoClad®, HVG Facades' premium solid aluminium panel solution, can be applied to even the most complex designs. MondoClad® is manufactured with stringent specifications and quality control requirements, adhering to strict NCC Compliance.

ZINTL

The ZINTL® aluminium interlocking cladding system is a favourite with architects, property developers, designers and builders alike for residential and commercial projects. Timelessly elegant and stylish, ZINTL® is available in a broad spectrum of colour options and weatherboard profiles.

NUCLEO

Nucleo® is made with two external layers of aluminium sheeting and a profiled aluminium core bonded together to create a lightweight and ultra-flat panel. Nucleo® is deemed to be non-combustible as per the National Construction Code (NCC 2022) and achieves 0 for Ignitability and Spread of Flame, when tested to both AS1530.1 and AS1530.3.

ALUCOBOND®

The ALUCOBOND® PLUS product range, manufactured in Germany by 3A Composites, is the most widely recognised aluminium composite material in the world. ALUCOBOND® PLUS is weather-resistant, highly durable and available in more than 50 colours, plus part of the range has the added ability to be bent, curved and shaped.
